

Chhattisgarh Swami Vivekanand Technical University, Bilai (C.G.)

Scheme of Teaching & Examination

Master of Engineering in Environmental Science and Engineering (Part Time)

Second Semester:

S.No.	Code	Board of Studies	Subject	Periods per week			Scheme of Exam			Total	Credits L+ (T+P)/2
				L	T	P	Theory / Practical				
							ESE	TA	CT		
1	653211(53)	Environmental Science & Engg.	Environmental Management	3	1	-	100	20	20	140	4
2	653212 (53)	Environmental Science & Engg.	Environmental Geosciences and Environmental Impact assessment	3	1	-	100	20	20	140	4
3	653213 (53)	Environmental Science & Engg.	Science & Engineering of Air Pollution Control	3	1	-	100	20	20	140	4
4	653221 (53)	Environmental Science & Engg.	Environmental Geosciences and Environmental Impact Assessment Lab	-	-	4	100	80	-	180	2
Total				9	3	4	400	140	60	600	14

L = Lecture, T = Tutorial, P = Practical or Term Work

Each period of 50 minutes, with 4 periods per day (6 to 9.20 PM) for six days in a week

Chhattisgarh Swami Vivekanand Technical University, Bhilai (C. G.)

Semester: M.E. II Sem.

Total Theory Periods: 40

Total Marks in End Semester Exam: 100

Minimum number of class tests to be conducted: 02

Subject: Environmental Management

Specialization: Environmental Science & Engg.

Code: 653211 (53)

Total Tutorial Periods: 12

Unit 1

Methodology of environmental management – Review national and international protocols.

Unit 2

Environmental quality criteria and standards significant sources of water and air pollution and indices of environmental quality – survey and hot spot identification.

Unit 3

Preparation of management plan – Case studies of major river basin and metropolitan air quality improvement plans.

Unit 4

Life cycle design and analysis, environmental auditing and Eco – labelling

Unit 5

Evaluation of environmental management programmes – Economic incentive and disincentives as instruments for environmental management – Tax, subsidies, fee, and tradable permits.

Chhattisgarh Swami Vivekanand Technical University, Bilai (C. G.)

Semester: M.E. II Sem.

Subject: Environmental Geosciences and
Environmental Impact Assessment

Total Theory Periods: 40

Specialization: Environmental Science & Engg.

Total Marks in End Semester Exam: 100

Code: 653212 (53)

Minimum number of class tests to be conducted: 02

Total Tutorial Periods: 12

Unit 1

Earth materials and processes, geologic cycle, River flooding, Landslide, Earthquake, Volcanic Activity. Hydrology and human use, the Geological aspects of Environmental Health. Mineral resources and Environment, environmental aspects of Mineral Development.

Unit 2

Evolution of EIA; EIA at Project, regional and Policy Levels; EIA process in India and other countries. EIA methodologies; screening and scoping criteria; Rapid and comprehensive EIA.

Unit 3

Specialized areas like Environmental Health Impact Assessment, environmental Risk Analysis; Economic Valuation Methods, Cost Benefit Analysis; Expert system and GIS applications, Uncertainties.

Unit 4

Practical Applications of EIA; Baseline Collection of data; Prediction and Assessment of Impacts of Physical Biological and Socio – Economic Environment, Generation of Environment Management Plan, Post Project Monitoring, EIA report and EIS, Review Process.

Unit 5

Case histories of applications for Industrial, Water Resources and Irrigation projects, Ports and Harbours, Mining and Transportation and other projects sectors, Regional EIA case studies for development of coastal and industrial Zones.

Semester: M.E. II Sem.

Total Theory Periods: 40

Total Marks in End Semester Exam: 100

Minimum number of class tests to be conducted: 02

Subject: Science & Engineering of air Pollution Control

Specialization: Environmental Science & Engg.

Code: 653213 (53)

Total Tutorial Periods: 12

Unit 1

Meteorology: influence of solar radiation and wind fields, lapse rate and stability conditions, characteristics of stack plumes, effective stack heights and spatial concentration distributions, Measurement techniques. Characteristics of various air pollutant particulates, health and nuisance/aesthetic considerations (PM_{2.5} and PM₁₀) and gaseous pollutants (CO, SO_x, NO_x, etc.), their behaviour in the atmosphere, monitoring..

Unit 2

Control of gases and vapours: adsorption, absorption, combustion, and incineration. Control of sulphur oxides and oxides of nitrogen, desulphurisation, kinetics of NO_x formation.

Unit 3

Photochemical reactions, role of nitrogen and hydrocarbons in photochemical reactions, air toxics, mobile sources of air pollutants, noxious pollutants, and odour control. Emissions trading.

Unit 4

Control of particulate emissions by mechanical collectors, bag filters, electrostatic precipitators and wet scrubbers.

Unit 5

Air pollution control systems for selected industries – fertilizer, cement paper, refinery, mineral and metallurgical processes

Semester: M.E. II Sem.

Subject: Environmental Geosciences and
Environmental Impact Assessment

Total Theory Periods: 40

Specialization: Environmental Science & Engg.

Total Marks in End Semester Exam: 100

Code: 653221 (53)

Minimum number of class tests to be conducted: 02

Total Tutorial Periods: 12

Practical of Environmental Geosciences and Environmental Impact Assessment

1. Use of High volume sampler for determining various air pollution parameters Collection of particulate matter using Air sampler.
Determination of NO_x and SO_x
Determination of carbon monoxide.
Determination of relative humidity of atmosphere.
2. Stack monitoring kit for determining common stack pollution parameters
3. Analysis of air quality (SPM, Temperature)
4. Analysis of air samples for metals (using AA spectrometer)
5. Tour of an analytical lab and/or air pollution treatment facility
6. Visit to industrial plants in Bilai City and any other place to see the working of air pollution control equipments.

FIELD STUDY

In-depth study of environmental issues at least one environmentally sensitive site relevant to the discipline of the student and preparation of a report thereupon.
