About Department of Computer Science & Engineering

Computer Science & Engineering is a discipline that combines both electronic engineering and computer science. Computer Engineers here are involved in many aspects of computing, from design of individual microprocessors, personal computers, and super computers to circuit design. This field of engineering not only focuses on how computer works but also how they integrate into the larger picture and wider domain.

The Department came into being in the year 2004. It has one of the best graduate as well as Post-graduate program. The course curriculum for graduate gives the flexibility to the students to prepare for advanced specializations and motivates graduates for post-graduation in current and upcoming fields of computer science and technology.

Currently the department has nearly 320 undergraduate students and 36 post graduates. Graduates from the department are recruited by both academia and industries. All over the country, ex-students of the Department occupy top positions in both academia and industries.
